Patients tell the machine their symptoms. And ask it where to go.

Private clinics, practices, care providers: today the AI answer comes before the referral.

307
websites audited

42.7
average score out of 100

6/100
entity infrastructure

Sector: healthcare · aivisibility.vargazoltan.ai/market

health.agentage.press

This is what they ask the machine. Are you in the answer?

EXAMPLE QUESTION

“Which private clinic offers a fast cardiology check-up?”

EXAMPLE QUESTION

“Where is knee replacement surgery done in Budapest?”

EXAMPLE QUESTION

“Which practice is recommended for paediatric allergy?”

Examples of the unbranded questions I measure in this field.

98–100%

asked by brand name, the machine identifies almost everyone

SECTOR MEASUREMENT

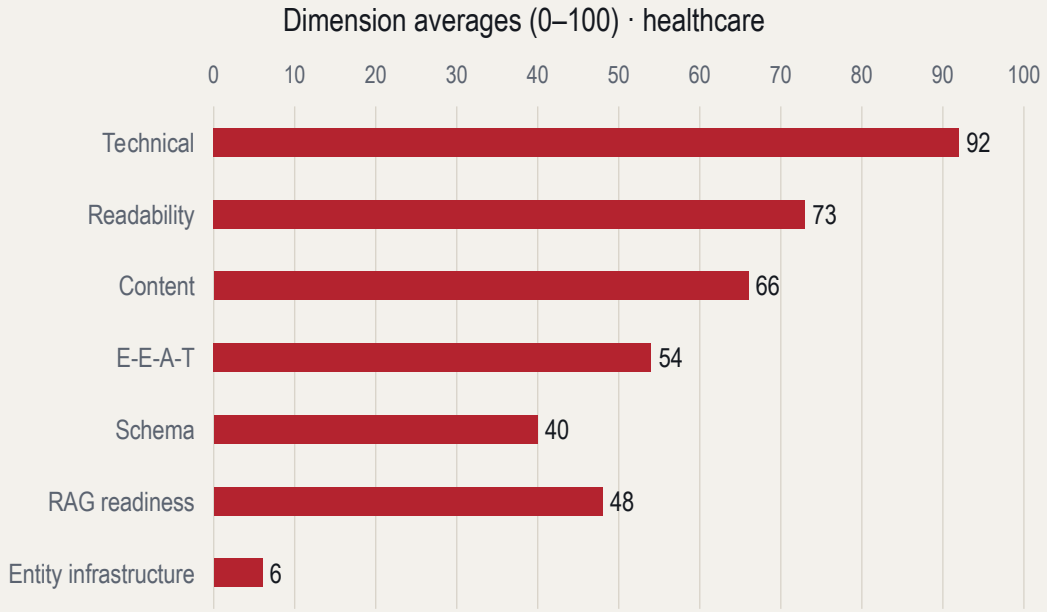

30.2%

For one private healthcare provider I measured a 30.2% mention rate on questions without the brand name.

6 brands, 3,328 real AI answers, October–November 2026, 4 engines.

Technically fine. Still unknown to the machine.

307
websites audited

42.7
average score out of 100

6 points: average entity infrastructure. The machine cannot link the name to the company

Meanwhile the technical average is 92. The problem is not the server; it is that the machine has nothing to cite.

Source: public market survey, aivisibility.vargazoltan.ai/market (25 dimensions, 145 checks), retrieved 2026-11-17. Mostly Hungarian websites.

I do not guess what works. I measure it.

01
DIAGNOSTICS
25 dimensions, 145 checks; real AI answers on 4 engines

02
RESEARCH
Source-verified market and competitor analysis (GFIS)

03
STRATEGY
Which questions you want to be in, and why

04
PRODUCTION
Citable, sourced content behind a quality gate

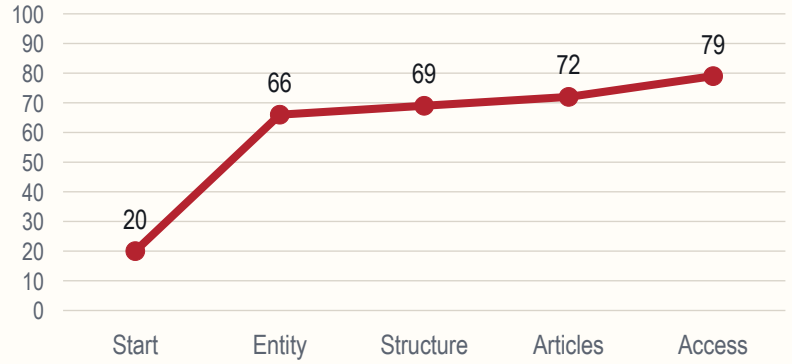

05
RE-MEASURE
Same question bank, dated, every two weeks

↻ **The loop closes and starts again. There is no average brand: each has its own error profile.**

What can be achieved? This is what I measured.

20 → 79 points in 15 days

A real estate website. Of the 521 real estate sites measured, the best scored 78; this site now scores 79.

2% → 75% ChatGPT citation

A new domain became a source in three quarters of ChatGPT answers within 9 days, and the level holds (73% in round 4). Cited on 43 of 50 questions.
